[6] As long as the particular 'cultural law' is based on the fully informed consent of all individuals within the particular 'cultural law' homeland community; and the 'cultural law' is practiced within the confines of the particular cultural law homeland community's territory; it is lawful; irrespective of how offensive it may be to the cultural values of a neighbouring homeland with different racial, religious, class, gender groups cultural law agreement values.

[7] Any groups cultural law is lawful within that cultural law homeland community's territory; and cannot be legally restricted or punished by a different group of individuals who have different subjective racial, religious or gender cultural laws, within their cultural law homeland territory.

[8] There is no restriction whatsoever on the choice of any groups fully informed consenting 'cultural law'; as long as it (a) does not violate EoP Scientific procreation and consumption laws; and (b) is based upon fully informed consent of all individuals within the privacy territory of the individuals 'self rule cultural law homeland'. For example: Armin Meiwes and Bernd Brandes fully informed consent cannibalism<sup>5</sup>, etc.

### **Cultural Law Homeland Rights and Duties:**

[9] Cultural law homeland rights will only apply to individuals or groups of individuals objectively and subjectively abiding by EoP Scientific laws:

[10] If or where a homeland agrees on a cultural law that restricts travel across their property ration homeland to individuals who are not members of their cultural law homeland agreement; they should clearly and simply notify neighbour property ration territories, and include a 'Whites / Blacks / Sharia Muslims / Jews Only Homeland' public notice at roads entering their homeland; where clear and simple definitions of 'whites, blacks, sharia muslims, jews' are provided.

[11] Ultimately as property swaps enable individuals with similar 'cultural law homeland' values to find property rations on the outskirts of existing homelands; enabling them to join a particular homeland, different homelands can create nature corridors between their homelands to protect their cultural values and minimize relating friction with homeland neighbours who have conflicting racial, religious, gender etc cultural law values.
