SHUT DOWN PONZI SWAMP ECONOMY

[eop-sdwipecon¹]

Summary of Transition to EoP Next Economy:

[1] Community Solution: Power of Community: How Cuba Survived Peak Oil²: The breakup of the Soviet Union in the 1990's created a major economic crisis in Cuba known as the special period. So we have from 1982 to 1983 a freefall of the economy of 34% of GDP, gross domestic product. When I tell you freefall of the economy, try to imagine an aeroplane suddenly lose their engines. It was really a crash. Cuba lost 80% of its export and import markets. Oil imports dropped by more than half, buses stopped running, factories closed, electricity blackouts were common and food was scarce. People almost starved. In reality when this all began urban gardening was a necessity. People had to start cultivating vegetables wherever they could. Over the next decade Cuba took drastic steps to find solutions. It is the first country to face the crisis that we will all face, the peak oil crisis.

[2] Industrial Economy Powerdown: Next Economy: Transition from Globalization to Eco-localism³: Energy: Rolling blackouts as coal / nuclear plants are progressively shut down. Agriculture: Conversion to soil regenerative low tech organic, permaculture, urban gardens; composting of manure and dead animals & humans; rewilding and reforestation of nature corridors. Transport: Animal drawn transport, bicycles, sailboats and walking. Trade: For emergency products only. Science and schooling: Education concentrates on practical ego/eco literacy cooperative soil low tech sustainable agrarian economy survival skills.

[3] EoP Axis Nationalization of Individuals Property:

[3.1] All individuals owning property greater than the EoP allotted eco-footprint [eop-footprint⁴] ration will have their property, in excess of the property ration nationalized.
